

Cell One now also has coverage in Karasburg, Khorixas and Omaruru

Cell One is proud to announce that from the first week of January 2008, residents of Karasburg, Khorixas, and Omaruru have become part of the ever increasing pool of Namibians that are able to chose Cell One as their mobile operator.

Cell One customers can now also enjoy continuous coverage on the road between Okahandja and Otjiwarongo, as a new site is established at Klein-Omatako in the Otjozondjupa region.

Cell One's coverage is now available in all the thirteen regions of Namibia. A glimpse at our coverage map (see www.cellone.com) shows that all the regions – from the Karas in the south, to the Kunene, Caprivi and Ohangwena in the far north are covered.

Cell One continues to expand its coverage area on a weekly basis and has succeeded to cover about 70% of Namibians by the end of 2007.

Cell One's Chief Marketing Officer, Ivar Talmoen says that as promised Cell One continues the expansion of its coverage throughout Namibia. "With coverage in all thirteen regions, Cell One is a choice for most Namibians only nine months after our launch. With a total of ten Cell One shops and an increasing number of distributors throughout the country, we are making sure that more Namibians get the Cell One experience – it is fun and easy to network!

"Cell One provides an excellent choice for Namibians", Talmoen concluded.
